EDUCATION

Emory University School of Law May 2028
Candidate for Juris Doctor

- **Activities:** *Vice President*, Non-Traditional Law Students Association; *Member*, Asian Pacific American Law Students Association; *Member*, Emory Law Intellectual Property Society

University of Illinois at Urbana-Champaign (UIUC) May 2021
Bachelor of Science in Computer Engineering - Highest Honors
Bachelor of Science in Statistics - Highest Distinction
Minor in Computational Science

- **Activities:** *Resident Advisor*, Upper-Graduate Housing; *President*, Electrical & Computer Engineering Student Government; *President*, Engineering Outreach Society
- **Honors and Scholarships:** James Scholar Honors, IEEE Eta Kappa Nu (HKN) Honors Society, Jules D. Falzer Memorial Scholarship, Sargent and Lundy Engineering Scholarship, TechnipFMC Scholarship

WORK EXPERIENCE

Marshall Gerstein & Borun Chicago, IL
Summer Associate July 2026 – August 2026
Technical Specialist / Patent Agent February 2024 – August 2025

- Drafted 20+ patent applications in AI, cryptography, blockchain, VR, databases, and autonomous vehicles
- Conducted 10+ examiner interviews to resolve Office Action rejections, moving applications to allowance
- Filed 20+ Office Action responses to §§ 101, 102, 103, and 112 rejections, securing allowance of 10+ cases
- Performed patentability searches and analyzed prior art to advise clients on the protectability of inventions

Baker Botts New York, NY
Summer Associate June 2026

- Authored a Law.com article analyzing *Hikma v. Amarin* and its implications for patent enforcement strategy
- Drafted a deposition summary for a university client in patent infringement litigation, distilling testimony
- Presented on the rise of venture capital funding in patent litigation and how it is transforming the landscape

Kilpatrick Townsend & Stockton San Francisco, CA
Patent Engineer August 2021 – March 2023

- Participated in 25+ invention disclosure meetings to identify patentable inventions and advise on filings
- Drafted 25+ patent applications, including claims and full specifications, across diverse engineering fields
- Prepared 20+ letters instructing foreign associates on claim amendments to overcome foreign office actions

Raytheon Missile System Tucson, AZ
Software and Electrical Engineering Intern May 2019 – August 2019

- Built 10+ C++ circuit component models from datasheet specifications, boosting simulation speed by 15%
- Developed 10+ reusable C++ schematic design blocks, shortening circuit build cycles and reducing rework
- Analyzed redesigned ESSM amplifier circuits for schematic errors and created block diagrams for reviews

ADDITIONAL INFORMATION

- **Programming Languages:** Python, R, C++, C, SQL, Mongo-DB, JSX, Javascript, HTML, CSS, Java
- Fluent in **Korean**; Volunteer experiences teaching Korean in Korean Learning Schools
- **Passionate** Chicago Bulls and Bears fan—seasoned in loyalty, patience, and long-term rebuilding
- A portfolio of patent applications, published articles, and software engineering projects can be found at **https://dchung1940.github.io**
